We declare that our product:

<u>Customer Material ID</u>	<u>Product ID</u>	<u>Product Description</u>	<u>FDA Legal Status:</u>
707007	SC784190	CONC. STRAWBERRY GINGER SC784190	NATURAL FLAVOR WONF

does not contain genetically modified organisms (GMOs) or ingredients produced from GMOs within the meaning of Council Directive 2001/18/EC, art. 2(2). Foods containing this flavor therefore will not be subject to the traceability and labeling requirements as intended under articles 4.5 of Regulation (EC) No 1830/2003 on 'traceability and labeling' and article 13 of Regulation (EC) No. 1829/2003 on 'genetically modified food and feed', both published October 18, 2003.

contains (an) ingredient(s) produced from genetically modified organisms (GMOs), such as soy and/or maize or other GMO species, permitted by Council Directive 2001/18/EC, art. 2(2), on the deliberate release of genetically modified organisms. It is subject to traceability and/or labeling requirements in the European Union (EU) under the terms of Regulations (EC) Nos. 1829/2003 and 1830/2003 on genetically modified food and feed.

contains (an) ingredient(s) produced from genetically modified organisms (GMOs), such as soy and/or maize or other GMO species, permitted by Council Directive 2001/18/EC, art. 2(2), on the deliberate release of genetically modified organisms. It is subject to traceability and/or labeling requirements in the European Union (EU) under the terms of Regulations (EC) Nos. 1829/2003 and 1830/2003 on genetically modified food and feed. However, the manufacturing process used for producing these raw material(s) would remove/destroy potential GM protein or DNA in the ingredient(s). This declaration is based on the common knowledge with regards to standard processing techniques used to manufacture raw materials used in our product and documentation received from our suppliers. It is not based on analytical testing. This additional information may be considered useful in those countries where GM-labeling legislation provides exemptions for highly refined materials containing no detectable forms of GM DNA or protein.

The above declarations are based on supplier documentation on the source of the ingredient(s) in the above product, not on analytical testing.

Sincerely,

Maria del Pilar Galeas
